

Smart Watches Reviews

Given rapidly evolving technology, the demand for watches has changed over the years. With the availability of technology, watches are no longer just telling you what time it is. These days, it assists in other pertinent areas of your life.

More than ever, the number of smart watches in the market has grown exponentially. A lot of big brands are now adapting technologies in order to redesign and reinvent the timepiece that we all knew. They've overhauled watches making it more versatile than ever.

It is now used by athletes to monitor their heart rate and improve their performance. It is even used by professionals to make life easier. Smart watches now make access to information easier for everyone. With internet connectivity, you can easily connect with friends and even find answers to your queries.

There are a lot of things that you'll typically see from these smart watches. But what makes the smartphones today stand out is the availability of apps. Apps make it easy for users to do certain tasks. You can install Uber, Yelp or even some messaging apps that can help your day-to-day activities.

But of course, keep in mind that not all smart watches are created the same. There are smart watches that fit certain personalities better than others. And also, there are those smart watches that have better overall functionality.

If you plan on investing on the best smart watches in the market, what are things that you'll have to check? Just like ordinary timepieces, smart watches also differ in terms of design. You'll want to decide which areas of your life you plan to make use of the device. There are watches for formal occasions, while there are those made for sports events.

Let's not forget that you are going to wear this device. You want to remain in style when you wear this device. Though probably it won't remain in style for years, given the fast pace improvements in technology, it is still important that you look good once you start using it.

Next, you might also want to consider the device compatibility. There are smart watches that work both on Android and iOS. It's a good idea that you invest on a smart watch that can be made compatible with the mobile device that you own.

And of course, just like any modern day mobile device that connects online, you always want to check the battery life of your device. How many hours can it last with a single charge?

Smart Watches	Features
Smartlife Sweatproof Smart Watch Phone for iPhone and Android Smart Phones Include Micro SD Card	<ul style="list-style-type: none"> • Sweatproof • Durable • Sporty
Smart Watch GT08	<ul style="list-style-type: none"> • Great for android phones • Can be used as a standalone mobile device

LG Electronics G Watch	<ul style="list-style-type: none"> • Functional design • Swappable wristband • Water resistant
Samsung Gear S Smartwatch	<ul style="list-style-type: none"> • Dual core processor • Can be used as a phone on its own • Connects on Samsung devices

It can be a bit confusing to choose the right smart watch for your needs. There are many brands, not to mention products that may seem very complicated to understand. With our extensive research, we've come up with 5 products that you might find interesting.

1. Smartlife Sweatproof Smart Watch Phone for iPhone and Android Smart Phones Include Micro SD Card

One of the biggest problems that users have with their smart watches is its compatibility with their device. The Smartlife Sweatproof Smart Watch is an example of smart technology versatility. It offers compatibility with both iOS and Android devices.

This is a sporty and stylish smart watch that you can flaunt while you work out regardless if you are running or hitting the gym. What makes this modern timepiece a good investment is the fact that it is also waterproof.

It has full-color display with its three stylish faces. It also has an adjustable band attached to the 1.54 inch touch screen monitor.

Calls, alarm, pedometer and beyond

For its function, you can expect the Smartlife Sweatproof Smart Watch to help you track your steps with its pedometer capability. It also has a sleep monitoring capability, not to mention it can also let you play music as you exercise. And since this is a small item, it has an anti-lost feature that you can connect with your Android system.

What's wrong with the product?

So what's wrong with the product? It is far from the perfect device. There are still things that it can still improve on. For starters, though it has compatibility with both iOS and Android devices, you still have to consider the fact that you can't enjoy all its features with certain devices. For instance, for iPhone, it

only supports partial functions such as calendar and call sync. As for the Android system, on the other hand, you can use the Facebook and Twitter App.

Another common problem that users face with this item is the fact that it can't hold charge long enough. It is important that the smart watch can at least hold a decent number of hours on a single charge.

Pros and Cons

Pros	Cons
<ul style="list-style-type: none">• Compatible with both Android and iOS• Durable• Stylish and sporty• Sweatproof• Full color display	<ul style="list-style-type: none">• Battery charge doesn't last long enough• Only certain compatibilities with iOS and Android

Conclusion

The Smartlife sweatproof Smart Watch is a good investment if you are looking for a sporty looking smart watch that can provide you with a number of functionality. Though you have to check the apps that are supported on your mobile device, this is still a great smart watch especially if you are looking for a device that can help you during your workouts.

It also has a number of great features since it allows you to receive emails, get texts and even answer phone calls.

2. Smart Watch GT08 Bluetooth with 16GB SD Card and SIM Card Slot for Android Samsung S5 S6 Note 4 5 HTC Sony LG and iPhone 5 5S 6 6 Plus Smartphones

Are you looking for a durable and stylish smart watch that you can wear proudly in different scenarios? The Smart Watch GT08 is compatible with different mobile devices including Samsung S5, S6 and Note 4. It is also compatible with other brands such as LG, Sony and HUAWEI.

Independent phone in your wrist

Smart Watch GT08 is more than just a device that tells you what time it is. Unlike a lot of smart watches that are heavily reliant on phones, this device can function independently as a phone, as long as you place a SIM card in it. However, if you opt to connect with your phone, you can choose not to place the SIM card, and it works perfectly fine by connecting it via Bluetooth.

Other than calls, it can also run independently using different apps such as Facebook and Twitter. And of course, it also has the basic functionalities expected from a smart watch. It has a pedometer, sleep monitor, sedentary reminder and many other features.

What's wrong with the product?

So what are the things that you might not like about the Smart Watch GT08? Though it offers versatility, it is only an entry level smart watch. Though it can be connected with your iPhone, there are still a lot of

functionalities missing for iPhone users. Other than that, you have a great device that you can use for different purposes.

Pros and Cons

Pros	Cons
<ul style="list-style-type: none">• Can be used as an independent phone• Great for Android phones• Has all the functionalities from pedometer to sleep monitor	<ul style="list-style-type: none">• Entry level smart watch• Some functionalities missing for iPhone users

Conclusion

If it is your first time to purchase a smart watch, it is a good idea to invest on the Smart Watch GT08. The Smart Watch GT08 has all the functionalities you ever wanted on a smart watch. In addition to this, you can also use it as an independent phone when you decide to place a SIM card in it.

3. Bluetooth Smart Watch, Evershop 1.3 inches IPS Round Touch Screen Water Resistant Smartwatch Phone with SIM Card Slot, Sleep Monitor, Heart Rate Monitor and Pedometer for IOS and Android Device

True to its nature as a smart watch, the main functionality of the Evershop smart watch includes a sleep monitor, heart rate monitor, calorie calculator and alarm clock. Beyond this, it provides both support for iOS and Android smart phones. This allows you to simultaneously receive notifications ready in your smart watch.

Among the things that you can receive include incoming calls, SMS, Facebook, WhatsApp messages and emails.

Slick and functional

One of the things that you'll notice with the Evershop Smart Watch is that it is slick in appearance. Unlike other smart watches in the market, it looks perfect for work and for formal occasions. And unlike other smart phones that run out of battery after a day, it runs on a 340 mah Polymer Battery that can support up to 5 days on standby.

This device is also known for its water resistant feature. Though it is not allowed to be used for swimming, it is protected from accidental spills when washing your hands, or when it gets caught in the rain.

What's wrong with the product?

Of course, it is far from the perfect smart watch. There are things that can still be improved. Though it offers a number of functional features, some of its apps are not exactly user friendly. For instance, you don't have the option to listen to music using your headphones. Instead, you will need to listen to your playlist out loud. Other functions are also a bit off. The heart rate monitor is not really accurate.

Pros and Cons

Pros	Cons
<ul style="list-style-type: none">• Battery lasts for days• Has the basic functions of a smart watch• Water resistant• Slick design	<ul style="list-style-type: none">• Heart rate meter not that accurate• Doesn't allow you to use headphones

Conclusion

If you want a simple but functional smart watch, you can always go for the Evershop Smart Watch. Though it is not as highly reliable as other smart watches in the market, it can still be useful in other scenarios. The best thing about this device is that it has a decent battery life.

4. LG Electronics G Watch

A lot of smart watches are already in the market today and we believe that the LG Electronics G watch is among the most underrated devices out there today. Though it is not a looker unlike other products in the market, the LG Electronics G Watch can give you the best bang for your buck.

This smart watch is highly functional both in terms of its features and its design. First, this device is highly fashionable. Though never a standout in the aesthetics department, this can easily be partnered with both casual and formal wear.

Among the things that make it appealing include its water resistant design. This means that it can withstand spills and even exposure to rain while you are running outside the house. Also, unlike other smart devices that are quite hard to read when out in the sun, the LG Electronics G Watch provides clear image even if there's sunlight.

In terms of battery life, this device can compete with some decent smart watches in the market. However, in the grand scheme of things, you can still say that it is a bit lacking in this particular department.

Superb Androidwear Device

The G Watch offers some things that are not commonly seen in other smart watches within its category. For instance, the G Watch has voice recognition. It also offers Android phone connectedness which may have more apps in the near future.

What's wrong with the product?

There are a number of things that can be considered a bit off with this device. First, if you are looking for a stunning watch, this isn't the product that you want to go for. It looks very ordinary to begin with. Next, you also have to consider the resolution of this product. In contrast to other smart watches in the market, this device offers a lower resolution. And though it has better battery life than other Androidwear smart watches, it is still considered horrible. Lastly, you have to consider the fact that it is only limited to newer Android devices.

Pros and Cons

Pros	Cons
<ul style="list-style-type: none">• Functional device• Swappable wristbands• Charging cradle• Water resistant	<ul style="list-style-type: none">• Very plain design• Battery life needs improvement

Conclusion

If you are not really into looks but just for the basic functionality of the smart watch, then probably the LG G Watch can meet your requirements. It has the makings of a good smart watch, though you shouldn't be expecting much in terms of resolution. Also, keep in mind that it only works with newer Android devices. Thus, you need to check your phone first if it is compatible with this smart phone.

5. Samsung Gear S Smartwatch, Black 4GB

The Samsung Gear S Smartwatch has a 2 inch display and is compatible with different Samsung mobile phones including Galaxy S III, Galaxy S4, Galaxy S5, Galaxy S4 Mini, Galaxy Note II, Galaxy Note 3 and Galaxy Note 4.

One of the things that you'll notice about the device is its bright display that has been curved. This allows users to easily see the notifications. In addition to this, unlike other smart watches that rely on phones, this can be used as your own phone. The Samsung Gear S has a slot for a SIM card.

If you are interested with a versatile device, this is a good purchase for you. It offers a music player not to mention features things that allow you to make your workout become more interesting. However, if you plan to maximize the overall features of the device, you will need to have a Samsung phone to go with it.

Superb specs

Samsung Gear S features its own speakers and microphones. It also has a decent vibrate feature that alarms when you have notifications. Among the things that you can enjoy using the Gear S include gyroscope, compass and its heart rate monitor. This device offers Wi-Fi connectivity, Bluetooth 4.1, and 3g cellular. In terms of its storage, it offers 4G and a 512 RAM. And to top it all off, it runs on a dual-core processor.

What's wrong with the product?

So what's not to like with this device? For one, it is hard to type using this watch. The good news is that it has voice recognition.

On its own, the smartwatch feels like an ordinary smartwatch, without the notifications. Unfortunately, Twitter, Facebook and other things you'll see in your phone won't show up unless it is hooked with your phone. And also, you have to be connected in order to use this smartwatch as a phone as well.

Pros and Cons

Pros	Cons
<ul style="list-style-type: none">• Superb design• Can be used as a phone• Has voice recognition• Superb specs	<ul style="list-style-type: none">• Hard to type• Needs to be connected online in order to use the phone

Conclusion

The Samsung Gear S is not really a standout product. However, if you are not the pickiest consumer, then probably this will get the job done. It offers superb specs, not to mention a feature that almost makes it a standalone phone.

Final Words

Thanks to newer technologies, how we use our wristwatches have evolved in the form of the smart watches. Smart watches can be a great tool for workouts, not to mention getting the usual notifications form texts to emails.

The reality is that there are a lot of smart watches in the market today. You may need to check the specs carefully if you are going to purchase one. For instance, there's a chance that your mobile device isn't going to be compatible with the smart watch.
